ASTV6300 LIQUID 10L BLUE

DANGER

READ LABEL BEFORE USE

Keep out of reach of children. Wash hands thoroughly after use. May be fatal if swallowed and enters airways.

DIRECTIONS FOR USE

To achieve the best results, ensure the animal is clean and dry before applying. Paint a 15cm long by 6cm wide stripe along the ridge of the backbone at the top of the cow's tail. Oestrus activity will be visible where rubbing or removal of the paint has occurred. Under the correct application and appropriate conditions, Donaghys tail alert will last on cows for up to 30 days on cows that have not cycled, depending on conditions.

MARKING INSTRUCTIONS

Apply tail alert to the herd 4 weeks before the start of mating. Record those cows with rubbed or broken paint as they will have cycled. After three weeks have the vet check all the cows which have not cycled. Re-apply tail alert to the herd at the start of mating with a second colour. Check paint every 24 hours. Cows with rubbed or broken paint have been on heat within the last 24 hours and are ready to be inseminated. Re-apply tail alert 12 hours following insemination with a third colour. If paint is rubbed or broken, these cows have returned to heat and failed to conceive.

HAZARD STATEMENTS

Flammable liquid and vapour. May be fatal if swallowed and enters airways. Causes mild skin irritation. May cause drowsiness or dizziness. Suspected of damaging fertility or the unborn child. May cause damage to hearing, central nervous system, liver & kidney through prolonged or repeated exposure. Toxic to aquatic life with long lasting effects. Harmful to the soil environment.

DONAGHYS

tail alert

LIQUID

Oil-based fluorescent tail paint
for detecting heat in cows.

PREVENTION STATEMENTS

Keep out of reach of children. Read label before use. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Avoid breathing vapours. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Wear protective gloves, clothing and eye protection. Use personal protective equipment as required.

RESPONSE STATEMENTS

IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. Do not induce vomiting. If medical advice is needed, have product container or label at hand. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. **IF ON SKIN (or hair):** Remove immediately all contaminated clothing. Rinse skin with water. If skin irritation or rash occurs, get medical advice/attention. **IF INHALED:** Remove to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell. If medical advice is needed, have product container or label at hand. **IN CASE OF FIRE:** Use water mist, alcohol-resistant foam, carbon dioxide or dry chemicals to extinguish. Collect spillage.

If exposed or concerned: Get medical advice/attention.
National Poisons Centre 24 Hour Phone: 0800 POISON (0800 764 766)

STORAGE

Store container locked up in a well-ventilated place. Keep container cool and tightly closed.

DISPOSAL

Dispose of this product and its container in accordance with local, regional and national environmental regulations.
