DONAGHYS Cowamel

Stock water flavouring

Use Donaghys Cowamel to sweeten drinking water particularly when adding supplements via an in-line dispenser.

- Makes stock drinking water more palatable
- Provides a disguise for any added supplements
- Encourages cows to maintain water intake

DONAGHYS
PERFORMANCE FIRST

Donaghys Cowamel is designed to make stock drinking water more palatable through the use of sweeteners such as caramel sugars. It also assists in disguising any supplementary products that are being administered through drinking water or oral drench applications.

Cowamel is also effective in assisting young stock when used as a flavour enhancement for any supplementary feed particularly when they progress from milk to a hard feed based diet.

DIRECTIONS

Through Water Supply

Can be added to drinking water via an in-line dispenser.

For improving water palatability - add 20-40mls of Cowamel for every 20 litres of water.

For water medication when using supplements, including Zinc and Magnesium - thoroughly mix 40mls of Cowamel for every kilogram of supplementary product. Dilute to your required application rate.

Oral Drenching

Administer orally via a drench application

For powdered supplements, including Zinc and Magnesium – thoroughly mix 40mls of Cowamel for every kilogram of supplementary product. Dilute to your required application rate.

For all liquid supplements, including Donaghys Mineral Concentrates and Premium Bloat – thoroughly mix 40mls of Cowamel for every litre of supplementary product. Dilute to your required application rate.

Supplementary Feed

Apply to supplementary feed at the following rate and feed out immediately after treatment

For all supplementary feed, including Meal Replacement or Hay - mix 250ml of Cowamel with 20 litres of water then apply the mixed liquid throughout the feed directly prior to feeding out.

Please Note: Donaghys Cowamel is not designed or suitable for human consumption.

STORAGE

Keep container closed.

Store in a cool place out of direct sunlight.
