

Donaghys Cowamel

Stock water flavouring

Use Donaghys Cowamel to sweeten drinking water particularly when adding supplements via an in-line dispenser.

- **Makes stock drinking water more palatable**
- **Provides a disguise for any added supplements**
- **Encourages cows to maintain water intake**

DIRECTIONS FOR USE:

Drenches: Zinc or magnesium oxide - mix 40mls (approx two capfuls) per kilogram of active product. Mix thoroughly and drench as per normal.

Bloat oils and other liquid compounds - mix 40mls (approx two capfuls) per litre of active product. Mix thoroughly and drench as per normal.

Water Medication: Magnesium sulphate/chloride, zinc sulphate - mix 40mls (approx two capfuls) per kilogram of active product. Mix thoroughly and dilute at desired rate to be dispensed through an in-line dispenser.

Hard Feed: Hay/meal - mix one cup Cowamel with 20 litres of water and sprinkle on the feed. Feed out treated hay/meal immediately.

Drinking Water: To disguise bitter tasting drinking water add 20-40mls (approximately two capfuls - 40mls) for each 20 litre of drinking water.

Note: Not suitable for human consumption

Store container in a cool, dry place. Replace lid after use.
