

## DairyMin® 5 Chelate

Donaghys DairyMin® 5 Chelate is a liquid mineral supplement for dairy cows from pre-calving through lactation.

- Provides a balanced blend of 5 essential trace elements that are important to ensure optimum health, immunity, fertility and productivity can be achieved.
- The minerals in DairyMin® 5 Chelate are supplied as organically bound chelates (with the exception of Selenium).
- Ready to use liquid formulation.
- Trace element levels per 4mL daily dose:
 

Copper Chelate	200mg	Zinc Chelate	100mg
Cobalt Chelate	2mg	Iodine* Chelate	10mg
Selenium	5mg		

*\*Organic Iodine (EDDI)*

### DIRECTIONS FOR USE:

- 4ml DairyMin® 5 Chelate per cow per day should be administered from approximately one month prior to calving through to the end of mating.
- 2ml\* DairyMin® 5 Chelate per cow per day should be administered post mating through lactation.  
*\*Use blood/liver results or Veterinary advice to confirm use of half rate.*
- Shake or stir well before administering Donaghys DairyMin® 5 Chelate through a calibrated dispensing system or through a water system using Donaghys torpedo dispenser.
- Do not use at the same time as other supplements of fertilisers which contain Copper or Selenium without advice from a veterinarian.
- See label for full information.

Donaghys recommend regular testing of blood and liver samples in conjunction with veterinary advice to confirm optimum mineral levels are supplied. (Many factors can cause differences in required mineral levels). In areas with specific mineral shortages, additional supplementation may be required.
