

Donaghys Atrazine 500

For post-emergent weed control in established Lucerne, maize, sweetcorn and non-cropland situations.

Active Ingredient: Contains 500g/L Atrazine in the form of a suspension concentrate

- Absorbed through the leaves and roots to inhibit photosynthesis
- For best results, emerging weeds should be young and actively growing and the soil surface moist and clod free
- Compatible with Donaghys Grunt 600 and Acetochlor 840

Weeds controlled

In Maize and Sweetcorn; Broadleaf weeds including Fathen, black nightshade, willow weed, redroot amaranths, apple of Peru. Some fathen plants are resistant to Donaghys Atrazine 500 and an alternative herbicide should be used.

In established Lucerne (at least one year old); Annual grasses and seedling broadleaf weeds such as shepherds purse, subterranean clover and storksbill.

Grain Maize, silage Maize and Sweetcorn application

Apply 1.5 - 3.0L in 200-300L of water per hectare. Apply early post-emergence to young actively growing seedling weeds up to 5cm high. Soil must be moist and a surfactant must be used. Shallow mouldings 7-10 days after spraying may improve weed control under dry conditions. Some Fathen plants are resistant to Atrazine. If those plants are present, an alternative is necessary to control them.

Established Lucerne (At least one year old) application

Apply 1.5-2.0L/ha plus 2-3L paraquat (20% ai) in 200-300L water. Use high rates of Donaghys Atrazine 500 only when storksbill is the predominant weed and has more than 4 true leaves. Apply closely grazed Lucerne stands during the winter months when Lucerne is completely dominant. Do not apply if the ground is excessively wet or in frost conditions. Allow a few days after grazing for weeds to recover before spraying.

Mixing

Invert container several times before opening. Stir well. Add the full quantity of product to the partly filled tank while agitating. Fill tank and agitate to ensure thorough mixing and continue agitation while spraying. Agitate vigorously from the bottom if allowed to stand. Reseal part used containers immediately.

SPRAY DRIFT WARNING

BEWARE: Apply this product carefully. Spray drift may cause serious damage to other desirable plants. Ensure compliance with relevant regional air management plans.
