

Donaghys Ecoflush

Donaghys Ecoflush is a patented low foaming concentrated acid sanitiser and is biodegradable. Ecoflush is highly effective in all water temperatures and in the presence of iron contamination or hard water. It is less damaging to many dairy surfaces and non-corrosive to steel.

- High Strength acid sanitiser, 50% mixed organic acids.
- Accelerates scale removal by up to 20% compared to conventional acids.
- Used at 66% of the normal rate (1mL per litre of water)
- Zero Quaternary Ammonium Compounds (QAC's).
- Dissolves milkstones and removes rust spots.
- Safe to use on a wide range of surfaces.
- Biodegradable Sanitiser.
- Low-foaming in hot or cold water.
- Especially suited for use with difficult wash water. (Iron or lime contaminated)
- Non-toxic.
- Less Corrosive.
- Economical to use.
- Environmentally friendly.
- Patented, ground breaking acid.

DIRECTIONS FOR USE:

Acid wash only. Please refer to Circomate or Protosolv for instructions on an alkali wash (minimum twice weekly).

Plant

Compliance requires all milk contact surfaces to be rinsed with a minimum of 5 litres of compliant water per set of cups before milking. Hot water discharge temperatures must be greater than 55°C.

- Dilute Ecoflush at the rate of 1mL per litre of hot water using the wash volumes:
Jetter/Bucket wash – 10L of wash solution per set of cups
Reverse flow – 20L of wash solution per set of cups.
- Drain Plant.

Bulk Milk Tank

Compliance requires all milk contact surfaces to be rinsed with a minimum of 120 litres of compliant water before milking. Hot water discharge temperatures must be greater than 55°C. The maximum water temperature for vat cleaning should be 82°C to avoid damage to the cooling pad.

- Dilute Ecoflush at the rate of 1mL per litre of hot water based on the wash volume as seen below.
- Recycle for 3min.
- Drain Bulk Mil Tank.

Donaghys Ecoflush

Volume of Bulk Milk Tank (Litres)	Wash Volume (Litres)	Volume of Bulk Milk Tank (Litres)	Wash Volume (Litres)
3400	120	12000	240
