

Donaghys Glycerine

Glycerine is an emollient and skin conditioner. Glycerine aids in the recovery of cracked and chapped teats and can be added to your Donaghys teat spray according to teat conditions and weather conditions.

- Contains straight Glycerine.
- Suitable for adding to all teat sprays.
- Use to replace up to 20% of water.

DIRECTIONS FOR USE:

Replace up to one part of water from teat spray mixture with one part of Donaghys Glycerine, e.g. in a 10L 1:9 teat spray solution, use 1L teat spray, 1L Donaghys Glycerine and 8L water.

Spray or dip teats with Donaghys Glycerine containing solution immediately after every milking.

As teat condition improved, reduce the amount of Donaghys Glycerine used.

If you are uncertain of use rates, consult your Donaghys Territory Manager for more specific use directions.

Code	Product	Unit	Qty per Unit	Barcode
