

Donaghys Iodine Concentrate

Donaghys Iodine concentrate is a liquid mineral supplement for Cattle and sheep. Iodine is required to promote thyroid function. Iodine supplementation can promote calf and lamb survival and growth rates, fertility and condition of treated animals and improve disease resistance.

- Dose rate is up to 0.1ml to 1.2ml per cow per day through the water supply. For sheep 10ml to 45ml per 1000 sheep per day.
- Drenched orally the rate is 3ml up to a maximum of 6ml per sheep 8 weeks before lambing and again 4 weeks before lambing.
- Donaghys Iodine concentrate is a liquid and ready to use.
- Donaghys Iodine concentrate contains 40 mg/ml of Iodine.

DIRECTIONS FOR USE:

- Donaghys Iodine concentrate should be used where a deficiency has been identified through animal testing or sampling of feed.
- Iodine concentrate should be supplemented in the period leading up to calving or lambing and especially when stock is or has been grazing Brassica crops.
