

Donaghys ProCalf®

Donaghys ProCalf® is a probiotic extract with selected live microbes licensed from AgResearch designed to enhance gut condition of calves during development of the rumen, with the added benefit of rennet to improve milk digestion.

- Provides a scientifically formulated blend of potent extracts of selected probiotic bacteria and yeast with added enzymes and rennet to ensure full liquid feed utilisation and aid the establishment of beneficial microbes in the digestive tract.
- For use on newborn calves as soon as possible after first colostrum until weaning.
- Apply by oral drenching, or mixing with milk / colostrum / calf milk replacer.
- If mixing, feed out within 20 minutes and ensure mix temperature does not exceed 38°C
- Milk retention in the gut reduces the chance of problems such as dietary scours.

DIRECTIONS FOR USE:

DOSE RATES:

- Newborns: bought in calves** 5mL initial dose.
- Calves: on milk, colostrum or CRM** 2mL / Head / Day.
- Calves: unthrifty or dietary scours** 5 – 10mL / Head / Day
