

Donaghys Selenium 5

Donaghys Selenium 5 concentrate is a liquid mineral supplement for cattle and sheep. Selenium is a vital component of antioxidants that assist in livestock performance and health. Selenium supplementation can promote general good thrift, improved milk production, fertility and disease resistance.

- 5mg/ml (elemental selenium) concentration.
- Donaghys Selenium 5 concentrate should be used where a deficiency has been identified through animal testing or sampling of feed and soil.
- Donaghys Selenium 5 concentrate should be supplemented in regions that are deficient in selenium, especially from 8 weeks before calving/lambing until several weeks after calving/lambing
- Donaghys Selenium 5 concentrate is in liquid form and is ready to use.
- Care should be taken not to oversupply selenium, as high levels of selenium can be toxic to livestock.
- Donaghys Selenium 5 concentrate should NOT be used in conjunction with selenised fertiliser or mineralized drench without consulting a veterinarian for advice.

DIRECTIONS FOR USE:

1mL of this product contains 5mg of Selenium.

Dose rate is 0.2ml per 100kg of liveweight per day, supplied through the drinking water.

Orally drenched at up to 1ml per 50kg liveweight, once every 3 weeks or applied to the supplementary feed at a maximum of 0.2ml per 100kg liveweight per day.
