Absorb spills with an inert material (such as earth, sand or synthetic absorbent substance) and place in waste containers. Wash area with water and alkaline detergent then absorb any remaining liquid with further inert material. Dispose of the waste safely in an approved landfill.

SAFETY DATA SHEET: A Safety Data Sheet for this product is available from Donaphys Limited on request.

GENERAL INFORMATION:

Donaghys TRON is a selective post-emergence herbicide for the control of various weeds in Fodder beet, Red beet, Sugar beet and Mangolds. Uptake is predominantly via the roots, with some uptake via the leaves. Some residual activity may occur. For best results apply to small weeds

Weeds controlled:

Susceptible: Amaranthus spp., annual poa, buttercups (seedling), chickweed, docks (seedling), fathen, galinsoga, groundsel, hawksbeard, henbit, matricaria spp. (stinking mayweed and chamomiles), nettles, pennycress, scotch thistle (seedling), shepherds purse, sow thistle, speedwells, spurrey, twin cress, white clover, wild portulaca, varrow (seedling),

Moderately susceptible: Black nightshade, field pansy, fumitory, hedge mustard, scarlet pimpernel, thorn apple, wireweed.

Non-susceptible: Californian thistle, cleavers, combind, grasses (most), wild pats.

DIRECTIONS FOR USE:

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

CROP	RATE	CRITICAL COMMENTS
Fodder Beet, Red	6L/ha in	Apply early post emergence, when weeds are small,
Beet, Sugar Beet,	200-300L/ha	and the crop has fully expanded cotyledons but
Mangolds	water	before the second true leaf stage.

APPLICATION METHOD:

Boom Spraying: Apply using conventional spray equipment with thorough agitation. Nozzles should produce a fine mist. Apply the required rate in 200-300L/ha water.

MIXING:

Shake well before use. Add the required quantity of Donaghys TRON to the partly filled with water spray tank, top up with water. Maintain agitation through filling and spraying.

RESISTANCE MANAGEMENT:

GROUP	5	HEBBICIDE

Donaghys TRON contains Group 5 herbicide belonging to the triazinone chemical family and continuous use of herbicides in this group may lead to a build-up of weeds resistant to it. To prevent or delay resistance, alternate with a herbicide from another group if possible and adhere to label instructions. Refer to http://resistance.nzpps.org/index.php for alternative modes of actions and details of resistance management strategies (if any) for the crops listed on the label.

IMPORTANT NOTICE - CONDITIONS OF SALE ACCEPTANCE AND USE OF THIS PRODUCT WILL BE DEEMED TO BE ACCEPTANCE OF THESE CONDITIONS OF SALE.

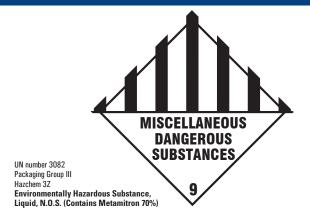

Results from the use of this product may be affected by factors beyond Donaghys control. These factors include but are not limited to mixing, use, time of application, weather, crop, crop lifecycle and resistance to the active ingredient, even though the product is reasonably fit for its stated purpose and label directions have been followed. Donaghys will replace any defective product free of charge, but to the extent permitted by law all other warranties, representations, conditions or obligations whether imposed or implied by law or otherwise, and the manufacturer's and supplier's liability for any indirect special or consequential losses or damages of any kind arising out of the supply and/or use of this product, including where it arises out of negligence, are expressly excluded. IN ANY EVENT, TO THE EXTENT PERMITTED BY LAW, THE MANUFACTURER'S AND SUPPLIER'S LIABILITY ARISING OUT OF THE SUPPLY AND OR USE OF THIS PRODUCT IS LIMITED TO THE AMOUNT PAID FOR THE SPECIFIC PRODUCT.

In a transport emergency call 111; Police or Fire Brigade. For 24 hours specialist advice in an emergency, call 0800 CHEMCALL (0800 243 622). If additional safety information is required, refer to the Safety Data Sheet (SDS). For a copy of the SDS phone Donaghys Limited (0800 942 006).
