

Donaghys Uddercontrol

Uddercontrol is a teat sanitiser containing Chlorhexidine Gluconate (22.5g/L) to assist in the control of mastitis in dairy cattle and as an aid in the control of teat cracking and chapping.

BENEFITS:

- Proven to be effective against mastitis causing bacteria such as *Escherichia coli*, (*E. coli*), *Staphylococcus aureus* and *Streptococcus agalactiae*.
- Improved and increased amount of glycerine emollient 300g/L.
- Contains a new generation surfactant to improve the active ingredients penetration through the skin / teat.
- Contains an additional disinfecting agent (ethanol) in an optimum concentration to provide disinfecting properties without irritating skin.
- Friendly on both the operator and the cow.

DIRECTIONS FOR USE:

As a teat dip:

Mix one part of Uddercontrol with four parts of cooled dairy heater water. Using a small non-metal cup, dip each teat of each cow after every milking.

As a teat spray:

Using a suitable pressure sprayer, mix one part of Uddercontrol with four parts of cooled dairy heater water. After milking thoroughly, spray the udder to ensure all over cover of cow's teats.

In extreme muddy or dry conditions up to 5% of water can be replaced by Donaghys Emolan.

It is recommended to spray cow's teats after each milking throughout the dairy season to assist in the control of mastitis.
