

Donaghys Uddermate

Uddermate is a teat sanitiser containing Chlorhexidine Gluconate, which is used to assist in the control of mastitis in dairy cattle and as an aid in the control of teat cracking and chapping.

BENEFITS:

- Proven to be effective against mastitis causing bacteria such as Staph Aureus, Strep. Agalactiae and E. Coli.
- Contains emollients, which will aid in maintaining smooth and soft teat skin
- Contains Glycerine B.P to aid in the control of teat cracking and chapping
- Can be used as a teat dip or teat spray
- Highly concentrated for economy in use – 44g/L of Chlorhexidine Digluconate
- Friendly on Operator and cow.

DIRECTIONS FOR USE:

As I teat dip:

Mix one part of Uddermate with nine parts of cooled Dairy Heater water. Using a small non-metal cup, dip each teat of each cow after every milking.

As a teat spray:

Using a suitable pressure sprayer, mix one part of Uddermate with nine parts of cooled Dairy heater water. After milking thoroughly, spray the udder to ensure all over cover of cow's teats. In extreme muddy or dry conditions up to 20% of water can be replaced by Emolan.

It is recommended to spray cows teats after each milking throughout the dairy season to assist in the control of mastitis.
