

Donaghys Zinc Chelate

Donaghys Zinc Chelate concentrate is a liquid mineral supplement for cattle. Zinc is required for immunity, fertility and electrolyte balance. Zinc can assist with improved skin, hoof and foot condition and promotes wound healing and resistance to foot infections. Zinc is also used at high therapeutic levels to prevent facial eczema.

- Donaghys Zinc Chelate concentrate should be given to high producing livestock or stock identified as zinc deficient.
- Donaghys Zinc Chelate concentrate should be used in conjunction with increased levels of copper supplementation.
- Donaghys Zinc Chelate concentrate should be used where a zinc deficiency has been identified through animal testing or sampling of feed.
- Donaghys Zinc Chelate concentrate is in liquid form and is ready to use.
- Donaghys Zinc Chelate concentrate contains 75mg/ml of elemental zinc in an organically bound form.

DIRECTIONS FOR USE:

Dose rate is a maximum of:

3 – 5mL per cow per day through the water supply

Facial eczema prevention rates are 3mL per 10kg liveweight or 4mL per litre of drinking water.
