

Donaghys Air & Milk Tubing

Cost effective hybrid rubber or PVC (transparent) air and milk tubing. Available in a range of popular sizes, Donaghys Air and Milk Tubing are suitable and approved for use in New Zealand dairy sheds.

The rubber milk and air tubing is made from black hybrid rubber material commonly used in the dairy rubberware industry. PVC air tubing is made from high quality PVC compounds and is transparent to ensure any blockages in the tubing are identified quickly. Both rubber and PVC air tubing are available in single and twin varieties in all common sizes to suit farmer preferences.

BENEFITS

- Hybrid rubber air and milk tubing will withstand operating temperatures of -40°C up to 80°C.
- Superb chemical resistance, excellent tube lifespan and light weight.
- PVC air tubing is transparent to ensure any blockages are identified.
- PVC tubing retains its transparency over time.
- Maximum resistance to clogs and kinks.
- Single white stripe, European Food Grade symbol and batch code printed on tubing every two metres for traceability.
- Tested on-farm and approved by AsureQuality to be used on dairy farms in New Zealand.
- Donaghys Air and Milk Tubing complies with the NZFSA (New Zealand Food Standards Authority) and BFR European Food Grade Standards.
