

Donaghys Milk Filters

Donaghys Milk Filters are manufactured from a super strong filtration material and easy to install for the prevention of sediment entering the farm milk supply.

Donaghys Milk Filters are available as white socks or sleeves and in a range of common sizes.

BENEFITS

- Super strong 75GSM material
- Excellent sediment filtration
- Enhanced flow rate
- Very soft texture and easy to install
- Filter elements will not split or puncture easily
- Strong glued Seams (FDA approved #175-105 & 175-300)
- Tested and approved for use in NZ dairy farms
- Available in all common sizes
- Currently available in white only
- Supplied in packs of 100
