DONAGHYS NOXIPOT POUR ON

LONG LASTING ENDECTOCIDE FOR CATTLE AND DEER

For the treatment and control of internal and external parasites of cattle (including lactating dairy cattle) and for the treatment and control of lungworm and roundworms of deer.

Improves milk production in lactating dairy cows and increases weight gains in growing beef and dairy cattle exposed to parasite challenge.

NET CONTENTS 20 Litres

ACTIVE CONSTITUENT Moxidectin 5g/L Contains Aromatic Hydrocarbons 150g/L

DONAGHYS MOXIPOTPOUR ON LONG LASTING ENDECTOCIDE FOR CATTLE AND DEER

READ LABEL CAREFULLY BEFORE USING Read label carefully and obtain special instructions before use. Do not handle it until all safety precautions have been read and understood.

HANDLING PRECAUTIONS May cause mild skin irritation. Moxidectin may possibly affect development and/or reproduction, and may have effects on or via lactation. Do not breathe mist, vapours or spray. Avoid skin contact. Avoid contact during pregnancy/while nursing. Handle with care. The use of chemically resistant gloves is recommended during use. Wear protective gloves and use personal protective equipment, as required. Do not eat, drink or smoke when using this product and wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace and should be washed before reuse. Store locked up. Harmfull if swallowed.

FIRST AID For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs remove contaminated clothing and flush skin and hair with running water. **ENVIRONMENTAL PROTECTION** Very toxic to the aquatic environment. Avoid contamination of any water supply with product or empty container. Harmful to the soil environment. Toxic to terrestrial invertebrates. Avoid release to the environment. Harmful to terrestrial vertebrates. **EMERGENCY RESPONSE** In case of spillage wear appropriate protective clothing and prevent material from entering waterways. Absorb spills with inert material and place in waste containers. Wash the area with water and absorb with further inert material. Dispose of waste safely.

DISPOSAL Preferably dispose of the product by use. Otherwise dispose of product and packaging at an approved landfill or other approved facility. Triple rinse the empty container, crush or puncture and bury in a suitable landfill, or if appropriate, recycle. Do not use container for any other purpose

member of the milbemycin/ avermectin family. It is effective against sensitive strains of the following internal parasites: **CATTLE** Gastrointestinal Roundworms: Adult and immature forms unless otherwise stated; *Haemonchus contortus* (barber's pole worm), Ostertagia ostertagi (O. lyrata) (small brown stomach worm including inhibited larvae), Trichostrongylus axei (stomach hair worm), *Trichostrongylus* colubriformis (black scour worm), Trichostrongylus longispicularis, Cooperia oncophora (small intestinal worm). Cooperia punctata, Oesophagostomum radiatum (nodule worm), *Bunostomum phlebotomum* (hookworm)

MOXIPOR POUR ON contains moxidectin, a

Lungworm: Adult and immature Dictyocaulus viviparus. Lice: Linognathus vituli, Haematopinus eurysternus, Solenopotes capillatus, Bovicola bovis. Mange mites: Chorioptes bovis. DEER Lungworm: Dictyocaulus ekerti

(viviparus).

Gastrointestinal roundworms: Haemonchus contortus, Ostertagia-like species*, Trichostrongylus spp, Oesophagostomum venulosum, Chabertia ovina *Ostertagia leptospicularis and Ostertagia-like species including Spiculopteragia assymetrica, Spiculopteragia spiculoptera and Skrjabinagia kolchida.

PERSISTENT ACTIVITY MOXIPOR POUR ON, following a single application at the recommended dose rate, prevents reinfection of: CATTLE with Dictyocaulus viviparus, Oesophagostomum radiatum and Bunostomum phlebotomum for 42 days, Ostertagia ostertagi (0. lyrata) for 35 days and Haemonchus spp and Trichostrongylus axei for 28 days, and

DEER with Dictyocaulus ekerti (viviparus), Ostertagia-like spp*, Oesophagostomum venulosum and Chabertia ovina for 42 days. *Ostertagia leptospicularis and Ostertagia-like species including Spiculopteragia assymetrica, Spiculopteragia spiculoptera and Skrjabinagia kolchida.

Resistance may develop to any anthelmintic. It is advisable that a resistance test be conducted regularly when using any parasite treatment. Ask your local veterinary practitioner or animal health advisor for recommended parasite management practices for your area to reduce development of resistance.

DRUM TAP ENCLOSED.

DOSAGE AND ADMINISTRATION: Dose Rate: 1 mL/10 kg to give 0.5 mg moxidectin per kg liveweight.

Liveweight (kg)	Dose Volume (mL)	Doses per 20L Pack	Liveweight (kg)	Dose Volume (mL)	Doses per 20L Pack

Registered pursuant to the ACVM Act 1997, No. A11390 See www.foodsafety.govt.nz for registration conditions. Approved pursuant to the HSNO Act, No HSR001850 See http://www.epa.govt.nz for controls.

DIRECTIONS FOR USE: By law the user must take due care, obtaining expert advice when necessary, to avoid unnecessary pain and distress when using the product other than as directed on the label.

Ready for use with standard pour-on equipment. **MOXIPOR POUR ON** should be applied along the top of the back from the shoulders to the base of the tail. Check accuracy of the pour-on applicator regularly. A representative sample of animals should be weighed before treatment either with scales or a weighband. Choose dose according to the weight of the heaviest animals. Do not underdose. Where there is a large variation in size within the group, draft into two or more lines based on body weight to avoid excessive overdosing. **Rainfast:** The efficacy of **MOXIPOR POUR ON** is not adversely affected if applied when the MoxiPor hide is wet, or if rain occurs shortly after the application. However treatment of animals under these circumstances is not recommended practice.

Non-irritant: MOXIPOR POUR ON does not cause irritation to the skin or damage to the hide when used as directed. Ease of Use: MOXIPOR POUR ON comes ready to use in applicator bottles. back packs or drums.

Concurrent Use: MOXIPOR POUR ON is safe to use concurrently with other treatments in cattle including mineral supplements, fluke treatments and vaccines. It should not be applied at the same time as any other pour-on product. Safety to Target Animals: MOXIPOR POUR ON has a wide margin of safety when used at the recommended dose rate.

WITHHOLDING PERIODS:

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.
