

Scorpius Elite Spot-On

DONAGHYS Scorpius Elite is a world first double active sheep spot on.

Double Active
Spot On

ACTIVE INGREDIENTS:

15 g/L Eprinomectin and 26 g/L Levamisole.

DOUBLE ACTIVE SPOT ON

WORLD FIRST TECHNOLOGY

- Scorpius Elite is highly effective against gastrointestinal roundworms and lungworms.
- Meets new regulatory standards using world first technology.
- Makes drenching quick and easy with less stress on the animals and reduced yarding time.
- Extensive trial work has been carried out across New Zealand demonstrating the efficacy of Scorpius Elite across a wide variety of parasites including some demonstrating resistance to triple combination drenches.

Scorpius Elite Spot-On

PRODUCT FEATURES

- Meets new regulatory standards using world first technology
- Increases farm productivity by decreasing time in the stock yards and stress to the animal
- Decreases labour units and time to get sheep drenched
- Scorpius Elite is a safe, highly efficacious and easy to use anthelmintic for all classes of crossbred sheep

WITHHOLDING PERIODS

Milk 35 Days

Meat 16 Days

It is not recommended to apply this product within 2 weeks of shearing (pre or post).

DOSE RATE

1mL/2.5kg

Registered pursuant to the ACVM Act 1997 No. A011728.
Patent pending 619027.

- *Haemonchus contortus* *
- *Teladorsagia spp.* *
- *Trichostrongylus spp.*
- *Cooperia curticei* *
- *Nematodirus spp.*
- *Strongyloides papillosus*
- *Oesophagostomum venulosum*
- *Chabertia ovina*
- *Trichuris ovis*

(*including inhibited immatures)

Also effective against:

- *Dictyocaulus filaria* (lungworm)

DOSE RATES

The dose rate for sheep is 1mL Scorpius Elite per 2.5kg liveweight. Refer to label for the dose rate table.

The scientific team at Donaghys have developed the new formulation, (patent pending) used in Scorpius Elite Spot-On. The product is administered as a spot-on on the back line between the shoulder blades. The drench nozzle is pushed through the fleece, applying the product directly to the skin.

The active ingredients are then absorbed into the blood stream via Donaghys' formulation which utilises a unique combination of solvents and various excipients.

For topical application only. Administer as a spot-on directly onto the skin on the backline between the shoulder blades.

PRODUCT APPLICATION

DRENCH GUN NOZZLE MUST BE PUSHED THROUGH FLEECE TO THE SKIN LEVEL.

WORLD FIRST DOUBLE ACTIVE SPOT ON
