

N-BOOST CROP TRIAL SUMMARY REPORT

Crop: **Poaceae (Corn Maize)**

Variety: -

Location: Ammeloe, Germany

Researcher: ADAMA

N-Boost application rate: 6L/ha

N-Boost application timing: -

Trial date: 2015

Grower standard yield: 237.6 Dry DT/ha

Grower standard with N-Boost: 248.1 Dry DT/ha

Summary: **There was an apparent response to base nitrogen but not to the additional nitrogen or N-Boost at tuber initiation. Overall, this trial saw a 4.4% increase in t/ha.**
